## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 3, 5, 10, 12, and 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The applicants amended the claims to recite that the oxygen free plasma process comprises heating to a specific temperature or application of a specific pressure. These is not supported by the original disclosure. The original disclosure teaches the referenced parameters for heat and vacuum processes respectively, not for the oxygen free plasma.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-3, 5-8, 12, and 17-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 1 and the dependent claims:

The claims are indefinite because it appears that some text is missing in claim 1 between "the process" (line 10) and "an oxygen free plasma process" (line 11).

As to claim 12:

It is not clear what referenced by "comprises heating the substrate comprises a temperature".

As to claim 17 and the dependent claims:

The claims are indefinite because it is not clear how can the process be an oxygen free plasma process and combinations with of this process with other processes.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3, 5-8 and 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Han et al (US Patent No 6,281,135).

Han et al teach a method for removing residue from low K dielectric as claimed.

See entire document, especially Detailed Description. It is noted that the subjecting the dielectric to plasma disclosed by Han et al would inherently result in exposure the dielectric to photons.

7. Claims 9, 10 and 12-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Han et al as evidenced by Chace et al (US Patent No 6,495,825).

Han et al teach a method for removing residue from low K dielectric as claimed.

See entire document, especially Detailed Description. It is noted that the

Art Unit: 1746

subjecting the dielectric to plasma disclosed by Han et al would inherently result in exposure the dielectric to photons as claimed.

Chace et al evidenced that exited gases disclosed by Han et al produce radiation in the claimed range. See at least column 4, lines 4-26.

### ***Response to Arguments***

8. Applicant's arguments with respect to claims 1-3, 5-10 and 12-20 have been considered but are moot in view of the new ground(s) of rejection.

The applicants amended the claims to require an oxygen free plasma or combination of the referenced plasma with heat and vacuum process. The amended claims are addressed in the rejection above.

### ***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1746

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
